Designed by God: The Biomechanics & Physiology of Dinosaurs

For the past 200 years, paleontologists have attempted to understand how dinosaurs ate, saw, smelled, breathed and moved. As more fossils are excavated, more details have come to light; however, paleontologists' failure comes from not giving God credit as the creator and designer of all life...including dinosaurs. Join Tommy Lohman as he unpacks how these great animals once lived as we give glory to God.
