Grand Canyon: Formed by Channelized Flood Runoff

Michael
Oard

Despite 150 years of effort, the origin of Grand Canyon is still a mystery for uniformitarian scientists.

For Creation scientists, the two main theories are: the Dam-breach, and Late-Flood Channelized Erosion theories.

This canyon is essentially a water gap, which the latter theory better explains. Mr. Oard's talk will delve into the many difficult aspects of how it was actually carved by Late-Flood Channelized Erosion.

When: Saturday,
June 3, 2023

Where: Family of Faith Church
6645 West Steger Road
Monee, IL

What:

Doors Open	5:00 PM
Popcorn	5:30 PM
Michael Oard	6:00 PM
Q & A	7:00 PM

Driving Directions: www.fofc.org

E-mail Questions to:
